Construction

Faber CNK Stone supplies essential construction materials including cement, thin set mortars, sealers, sand, and polymeric sand—providing reliable, performance-driven solutions for complete stone and hardscape installations.

Cement

Our cement selection includes white and grey Portland cement as well as masonry cement options, designed to deliver consistent strength, color stability, and reliable performance. Suitable for natural stone installation, masonry work, and architectural applications, these products ensure durable, professional-grade results on every project.

Thin Set

Thin set mortars provide strong bonding performance for natural stone and tile installations. Formulated for durability and workability, they ensure reliable adhesion, long-term stability, and professional results in both interior and exterior applications.

Sealer

Sealers protect natural stone surfaces by enhancing resistance to moisture, stains, and wear. They help preserve the stone's natural appearance while extending durability, making them essential for long-lasting, low-maintenance installations.

Polymeric Sand

High-quality sand is essential for stable, long-lasting installations. Used for bedding, joint filling, and leveling, it ensures proper drainage, structural support, and a clean, professional finish in hardscape and stone applications.

Exterior Covers

Hidden Access Systems integrate essential access points into outdoor surfaces with a clean, seamless finish—preserving design integrity without compromising function.

- Skimmer Covers
- Drain Covers
- Access Covers
- Concrete Covers

Custom Fabrication

We have an in-house fabricator, so any special order pieces we can provide quickly and efficiently. This also allows us to quickly quote projects with custom pieces. Whether you need a custom size, double or multiple bull nosed sides, we will happily provide them for you.
